Flexotherm™ manufactures custom designed, high quality, heated ground thawing mats for a multitude of applications and industries.

Our Heated Ground Thaw blankets offer an even and continuous heat source for any type of job you need done.

**FEATURES**

- High efficiency carbon heating grid evenly distributes heat over the entire blanket area
- Heating element is built with an Integrated Temperature Thermostat as a Redundant Safety Feature
- HeatGrid™ decreases current as temperature increases, which results in a safer product.
- Outfitted with a GFCI for extra security for both the product and user
- Scuff, water, and UV resistant
- Vinyl Panel Perimeters are sealed with a Fully Welded Seam
- NFPA Certified Flame Retardant
- Every blanket includes a full-layer of high thermal efficiency, closed cell foil faced insulation, directing the infrared heat to the desired location
